High Flight

—

Oh! I have slipped the surly bonds of Earth
And danced the skies on laughter-silvered wings;
Sunward I've climbed, and joined the tumbling mirth
of sun-split clouds, - and done a hundred things
You have not dreamed of - wheeled and soared and swung
High in the sunlit silence. Hov'ring there,
I've chased the shouting wind along, and flung
My eager craft through footless halls of air....

Up, up the long, delirious, burning blue
I've topped the wind-swept heights with easy grace.
Where never lark, or even eagle flew -
And, while with silent, lifting mind I've trod
The high untrespassed sanctity of space,
Put out my hand, and touched the face of God.

John G. Magee

AN-SS Military model seat-type parachute.

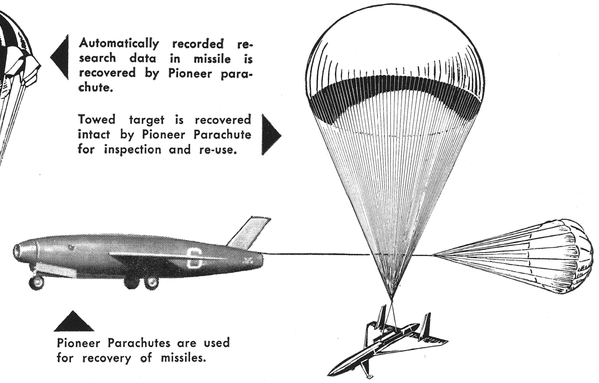

P7-B and P9-B Guide Surface Personnel parachute.

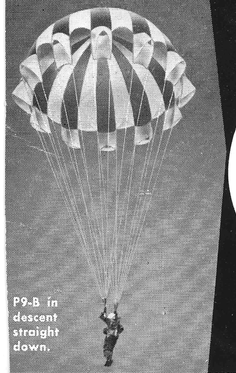

Automatically recorded research data in missile is recovered by Pioneer parachute.

Towed target is recovered intact by Pioneer Parachute for inspection and re-use.

Pioneer Parachutes are used for recovery of missiles.

P9-B in descent straight down.

PIONEER PARACHUTES

precision engineering and quality-controlled manufacturing standards

MAKE THE DIFFERENCE!

In life saving parachutes, in cargo parachutes, in missile recovery parachutes, in jet plane brake parachutes — wherever parachutes are used — the name Pioneer is symbolic of *quality craftsmanship* and *engineering proficiency*.

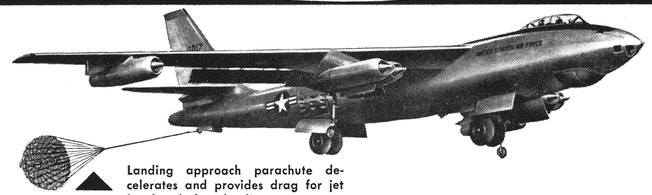

Look to Pioneer for *leadership* in parachutes for *every* purpose.

P-T-10 — Latest troop parachute — 35 ft. diameter canopy.

All Pioneer Parachutes are equipped with exclusive "Quick-Fit" harness.

Landing approach parachute decelerates and provides drag for jet bomber before landing.

Ribbon type brake parachute, employed after touch-down, shortens landing roll of jet bomber
